TREE PLANTING AT THOMPSON PARK

Discussion ensued, comments made were:

- Norway Maples are not on the approved tree list
- Ideal to see varieties and caliper size, more detail & a diversified canopy
- Consider the oaks and honey locust planted on the other side of the street when thinking of tree list – diversity while considering the whole area and what's planted is ideal
- consider the deer grazing in the area
- provide a plant list specificity what will be planted, plant counts/quantities, varieties
- a new architect took over this project and they are motivated to get the project done
- provide a new irrigation plan, including a quick coupler unit
- private streets in the development will be maintained by the HOA, trees in the right of way along 133 & triangle park will be maintained by the town arborist
- concerns about blocking Mt. Sopris views
- innovation on the landscape plan
- no evergreens are in the plan – could take away from winter color
